## **EXTENSION**

### **Governance of Infrastructure in the Amazon**

The Governance and Infrastructure project is concerned with forming communities of practice among conservation and development professionals in four focal areas, the Caqueta in Colombia, the Upper Madeira in Bolivia and Brazil, the Lower Madeira in Brazil, and Loreto in Peru. As the UF faculty lead for Peru I am tasked with convening, organizing, and implementing events and activities with local and international NGOs, local researchers, regional and national government representatives to establish a strong base for a community of practice that can result in effective governance of infrastructure that will support sustainable socio-ecological systems in the Amazon.

- 2019 **Almeyda Zambrano, Angélica M.** “Unmanned Aerial Vehicles (drones) for governance of infrastructure in the Amazon.” International Webinar sponsored by the Universidad Amazonica de Pando, Bolivia, and the University of Florida. March 12th. [Invited].

### **Unmanned Aerial Vehicles**

The GatorEye Unmanned Flying Laboratory main's purpose is research. However, as the Co-director I have had the opportunity to coordinate and give talks on the role of advanced sensors such as LiDAR and hyperspectral in ecological research and in monitoring of natural resources to various institutions in Peru, Costa Rica, and Brazil.
