

Let's talk story. Biocultural Conservation in Higher Education

BIO

I received a BS degree in Biology from the Pontificia Universidad Católica de Chile, and came to the USA with a TCD fellowship to pursue graduate studies. I received a MS degree from the Geography Department at the University of Florida and a PhD from the Biology Department at the University of Maryland. My research interests: climate change impacts, biodiversity, biocultural conservation, and education.

SUMMARY

I will share some of the insights and practical knowledge I gained exploring the field of Biocultural Conservation by interviewing leaders in Biocultural Conservation. I will also share some of the insights these leaders have about the role of Academia in helping address the biological-cultural diversity crisis.

Tropilunch is a seminar run by graduate students from the Tropical Conservation and Development (TCD) Program. It provides a forum for a range of discussions and presentations related to TCD work and research. Special guests, visiting scholars and practitioners also participate. It happens weekly around lunchtime.
