

TROPICAL CONSERVATION  
& DEVELOPMENT PROGRAM  

---

UNIVERSITY OF FLORIDA

## **TCD SG CONSERVATION AND DEVELOPMENT FORUM (CDF)**

### ***“Community Based Natural Resource Management in Asia: Case studies & perspectives for the future”***

**When:** Friday, April 5<sup>th</sup> from 2:00 to 3:30 pm

**Where:** Grinter Hall 376

**Who:** TCD, MDP, SNRE, WEC, SFRC, IFAS students and faculty

Tropical Asia is one of the world’s most challenging and rewarding regions for working in conservation and development issues. The human dimensions of this work, especially how communities relate to their natural resource base, will be the focus of this forum. The goal of the CDF is to expose students to a more informal space for discussion that builds upon first-hand experiences. The forum will consist of short presentations given by Dr. Rick Stepp (Anthropology), Indah Bong (MDP), Bhuwan Dakal (Tourism), Divya Vasudev (WEC) and Varun Goswami (WEC). Presentations will be followed by a general group discussion.
